and that he receives a pension of eight (8) dollars per month.

He makes the following statement upon which he bases his claim for increase

[Original, increase, restoration, &c.]

Here give the claimant's statement as briefly and as compactly as possible.

His left eye is failing for distant vision; he frequently sees double. His varicose veins are smaller, but this diminution in size has been succeeded by frequent cramps in the leg. Eyesight is so poor that he is unable to follow his trade of a carpenter.

Here give a full description of the disability, in accordance with pars. 5, 6, 51, 52, &c., of Book of Instructions for 1889

Upon examination we find the following objective conditions: Pulse rate, 76; respiration, 18; temperature, 98.5; height, 6 feet — inches; weight, 151 pounds; age, 57 years. Pensioner is a rather spare man, hands hard, muscles small and soft, tongue clean, walks erect, and with vigor. There are extensive varicosities of veins of rt. leg. extending from ankle to knee - see diagram - There is a linear cicatrix extending across upper third of rt. cornea, partial loss of iris, and complete opacity of lens. There is only perception of light. Left eye: media clear, fundus healthy, V. = $\frac{20}{30}$. There is slight refractive error and no disease of same. No other physical signs of disease or disability.

Rate for EACH cause of disability.

He is, in our opinion entitled to a 8/18 rating for the disability caused by varicose veins rt. leg. 8/18 for that caused by loss of sight rt. eye, and none for that caused by disease of left eye.

his leg I considered in a very bad shape
after we left Louisville Kentucky Moore was

Degree now paid and for what disability.

Reason for claiming increase and degree claimed.

WE HEREBY CERTIFY that in compliance with the requirements of the law* we have carefully examined this applicant, who states that he is now pensioned at a Eight dollars disability on account of Loss of sight of right eye

and that he claims an increased rating for the reason that he has Varicose veins of right leg. and that he is now disabled to total degree for earning his subsistence by manual labor.

His pulse-rate per minute is 84; his respiration 24; his temperature 100°; his height is 6 feet and — inches; he weighs 147 pounds, and he states that he is 52 years of age.

Here give the claimant's statement of his reasons for claiming an increased rating as fully and as completely as possible.

Touching his disability and his reasons for asking an increase of pension, he makes the following statement: Went at Nashville Tenn, March 3rd 1865. he had a gun cap strike the right eye and had to be removed. Says he began to have veins of right leg become enlarged in 1862 while in service and on march from Lexington to Louisville, Ky. which increased until mustered out and has done so since discharge.

SUBJECTIVE SYMPTOMS.

Upon examining this applicant we find the following objective conditions which, in our judgment, do

Here give a full description of the conditions by which the claimant is now disabled, and compare his present condition with that which existed when the present rating was allowed.

entitle him to an increased rating: We find right eye with an opacity of cornea passing across the entire cornea in median line of same from outer to inner side. Iris adherent to outer portion of its area. Find leucomatous spot in crystalline lens which in the total destroys all use of eye, but can discern some light. Find right leg has varicose veins from behind knee to the ankle and on sides of foot. There is no old scars on leg or present ulcers on the same. Does not wear an elastic bandage or stocking. Find him with evidence of present temporary fever from apparent partial pneumonia from cold, not result of any previous condition. No sympathetic.

OBJECTIVE SYMPTOMS.

From the existing condition and the history of this claimant, as stated by himself, it is, in our judgment, probable that the disability was incurred in the service as he claims, and that it has not been prolonged or aggravated by vicious habits. He is, in our opinion, entitled to a total rating for the disability caused by loss of sight of right eye, three eighths or that caused by Varicose veins of right leg, and — caused by —, the sum of which aggregates (11/16) eleven eighths

In the matter of the application for Invalid Pension No. 133,192

1864 to the 6th Day of March 1865 continuously and was under
Command of Maj. James R. Willett during said time and under

reasons above stated he is unable at this time to furnish
further Evidence of his being on Detached Duty.

He further says that during the fore part of said Detached

Cause of disability.

WE HEREBY CERTIFY that in compliance with the requirements of the law* we have carefully examined this applicant, who claims that while in the service of the United States at or near a place named Nashville Tenn., and while in line of duty, on or about the 3^d day of March, 1863, he incurred loss of sight of right eye

Degree of disability.

and that in consequence thereof he is disabled for earning his subsistence by manual labor

His pulse-rate is 72 per minute; his respiration 18; his temperature normal, his height is 6 feet and 7 inches; he weighs 175 pounds, and states that he is 52 years of age.

Here give the statement of the claimant fully, but as compactly as possible.

Touching the cause and degree of the disability for which he claims a pension, he makes the following statement:

That he is entirely unable to see any thing with right eye, but can distinguish between darkness and light. Says that his left eye is weak and at times causes him some pain and thinks this comes from over use not having the aid of right eye. Says he can do nothing now only unskilled labor and not all kinds of that. Was formerly a Carpenter, but can no longer follow his trade on account of his blindness.

Here give a full symptom picture of the case, embracing all the physical and rational signs, but confining it to the present condition of the claimant.

The examination reveals the following objective facts in support of his statements:

We find a cicatrix of wound over the pupil of right eye and a general agglutination at the point of the wound of all the tunics of the eye. We find a resulting opacity of the cornea of the right eye over whole extent of the pupil so that he can see nothing with that eye. We are very much in doubt that the operation of Iridectomy would benefit him much.

Here give rating for each cause of disability, and state the aggregate.

From the existing condition and the history of this claimant, as stated by himself, it is, in our judgment, probable that the disability was incurred in the service as he claims, and that it has not been aggravated or prolonged by vicious habits. He is, in our opinion, entitled to a total rating for the disability caused by loss of sight of right eye for that caused by , and for that caused by , the sum of which aggregates total rating
